Sylution Incorporated Named by Parsec Automation Corp. as Reseller for Southeastern U.S.

Jesup, Georgia, November 28, 2006 – Sylution Incorporated of Jesup, Georgia today announced the signing with Parsec Automation Corp. of Brea, California, as the value-added reseller (VAR) for sales and support of the company's TrakSys™ software in the southeastern United States. Sylution will represent the company in Virginia, North Carolina, South Carolina, Georgia, Florida and Tennessee.

“We're very happy to add the TrakSys™ system from Parsec Automation to the array of manufacturing decision support products we provide,” said Kevin Totherow, Sylution president. “Parsec's TrakSys™ real-time performance management software built on Microsoft .NET technology is a very significant upgrade to the older downtime and OEE products with new connectivity options as well as analytical and collaboration options. The TrakSys™ product fits very well into our company and we look forward to working to help existing Parsec customers.”

“Sylution Incorporated is a great addition to our channel because they are focused on providing business intelligence solutions to the manufacturing and process industries,” said Eddy Azad, Parsec Automation President. “They're well-known in the region for their leadership in value-added sales and support services, providing more than just the best product lines but also offering application knowledge, project management and enterprise integration capabilities that are so valuable to end users.”

TrakSys™ is powerful real-time performance management software application that helps clients maximize production efficiency and asset utilization through meaningful, accurate, and timely analysis and reporting. TrakSys™ 4.0 is a key enabler of Lean, Six Sigma, OEE and other KPI-based continuous improvement initiatives. It clearly establishes a deterministic approach to collecting, evaluating, reporting and acting on data that is critical to the success of these productivity programs.

About Parsec Automation

Parsec Automation, based in Brea, California, is the creator of TrakSys™ Real-Time Performance Management software as well as DT Analyst™ an older downtime and OEE system distributed by Wonderware Corporation. Hundreds of copies of Parsec Automation's software have been successfully deployed worldwide and are providing measurable performance improvement for users. TrakSys 4.0 is a powerful upgrade available for users of DT Analyst™ software.
