## Sylution™ Constraint Machine RPM

### OEE, Downtime, MTBF, more

Sylution's Constraint Machine Only solution is built upon Parsec's award winning TrakSYS™ RPM software. The software version is the same that has been used successfully on the portable LEAN-Trak™ system.

The system measures rate, product counts and downtime on one machine and provides detailed performance reporting of the entire line.

The system is sold complete: Software, Sensors, configuration and Industrial Computers. The only decision is whether to buy the standalone system for one user or have the system on a network so that five (5) remote users can see the web reports for the line.

Main Performance Overview

Operator Interface

Journal Report, OEE by Shift, and Rate Report.

- ⇒ No connection to existing controllers required
- ⇒ No lengthy configuration
- ⇒ No interference with operations
- ⇒ No training classes needed
- ⇒ Non-GMP
- ⇒ Configuration, Operator Interface, and reporting software included
- ⇒ 100% credit for upgrade to larger bundle of TrakSYS™
